

[Podcast Episode Ep 95 - Aeva \(@aevavoom\) on Ethics and Bias Challenges in ML/AI and What We Can Do](#)

Aeva (@aevavoom) joins me for a very insightful, thoughtful discussion that covers some very interesting and challenging aspects of tech and society. We delve into the challenge of bias in data which can influence ML and AI, but more importantly, how we must think about it and how we can mindfully approach ways to deal with and hopefully alleviate these issues.

You can find more about Aeva at <https://aeva.online> and stay tuned for some more deep discussions as I hope to have Aeva back on the show much more in the future to dive into specifics of some of what we covered here. A must listen show for sure!
