

Community Coffee Bean Exchange at AWS re:Invent 2019

Got beans? Want beans? Coming to AWS re:Invent 2019 in Las Vegas? Welcome to the Community Coffee Bean Exchange group! This is an informal group which has developed quite a loyal and tasty following at a few conference events already!

How does Community Coffee Bean Exchange Work?

Find a local roaster or some of your very favorite beans. Package up one or two single pound bags and bring them to AWS re:Invent with you in Las Vegas. Everyone who fills out the form below (that's the important part) will be a part of the exchange. Our crew (aka DiscoPosse and anyone willing to help) will mix and match the caffeinated goodness and prepare pickup packages for folks to take back to their home coffee brewing stations.

Where to Bring your Beans

The plan is to drop things off at the Turbonomic booth during expo hours and pickup will be at the same location. This way it's easy to find and it has good hours with the Expo access. Just fill in your email in the form below and the rest of the communications with bean exchangers will be done via email. Looking forward to seeing everyone at the event!!
