

# Interop ITX - Call for Presentations

Interop has gotten a new name, some new branding, and I'm proud to announce that I've joined the Interop ITX Review Board for 2017! There are lots of things happening to make the Interop conference a true destination for both technical and business IT consumers which will get you information and interactive experiences at all layers of the IT stack.

Interop ITX will be from May 15-19, 2017 at the MGM Grand in Las Vegas.

## Call For Presentations Open until October 31 - 10 Days Left!

At the time this publishes, there are 10 days remaining to submit a call for proposals which can be done here. That gives you a chance to contribute your voice to the speaker lineup at a strong, community-focused event. This is the chance for us to shape what we want Interop ITX to be for us, and for our community at large.

The content streams are very exciting, so you won't want to miss this if you have the chance to attend.

### Infrastructure

Stay up to date on emerging technologies in networking and IT operations while leveraging your existing systems.

### Data and Analytics

Build support systems that can capture data from disparate locations, aggregate, correlate, and deliver insights in real time.

### Cloud

Select and leverage the cloud resources that make sense for your businesses and manage them in a holistic approach.

### Security

Learn more about potential threats and how you can mitigate them.

### DevOps

Educate IT about development and building cross-functional teams, adopting agile methodologies, and implementing automation.

### Leadership & Professional Development

Work hand in hand with business, build the teams you need to adjust to changing requirements, and provide guidance for navigating career development.

Before you go, here are the links that help you find out about the event and to submit your CFP:

# **LINK ALL THE THINGS!**

These are the key links you'll need to get started:

- Pre-Register for Interop ITX 2017
- Submit your Call for Proposals
- Interop Home Page

I hope to see you at the event!
