

[Podcast Episode 118 - Reimagining the Future of Vision plus Lessons in Learning, and Customer and Patient Experience with Dr. Steven Tersigni](#)

Dr. Steven Tersigni is one of the world's first certified Light Adjustable Lens surgeons. Steven has operated on some of St. Louis' most famous influencers. He has been published in national journals and has authored and edited content for numerous medical educational publications and websites. He has been an investigator on nine U.S. FDA trials involving advanced technology lens implants, corneal treatments and investigational therapeutic medications, among other studies.

This conversation spans everything from the science that's bringing advancements to corrective eye surgery to powerful lessons in business, learning, and how the patient (and customer) experience can be advanced through the power of empathy. A strong set of lessons for anyone regardless of their background.

Check out Dr. Tersigni's practice at Brinton Vision here: <https://brintonvision.com/>

[April 2020 Free Training Special from](#)

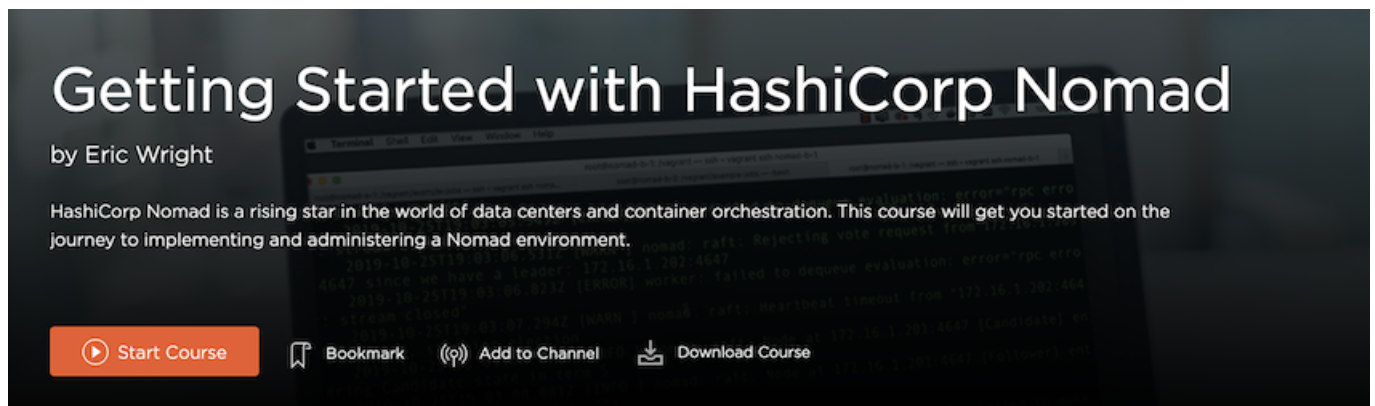

[Pluralsight!](#)

The team at Pluralsight have kindly opened up the platform for free in order to allow folks to skill up while being under the challenge of the current worldwide situation. Being at home should not mean being out of the game. If you are looking to skill up on any of a variety of literally hundreds upon hundreds of courses, Pluralsight is a spectacular option for you.

Just [click this link to get setup and you are off to your learning journey!](#)

My own course on [HashiCorp Nomad is among those that are completely free for the month of April](#), so I will obviously recommend that you try it out and get your Nomad and container journey underway. Please share if you enjoy and find value in the course as well as any ideas or feedback on what I can do with future advanced courses on Nomad.

Big thanks to the team at Pluralsight for opening this up and it is a testament to their support of the community.

[Podcast Episode 105 - Why Math in Our Schools is Failing our Children and How Elephant Learning is Changing the Game](#)

Aditya Nagrath is the founder of [Elephant Learning Academy](#) and shares a heartfelt story of how our school system and the math learning programs are not doing what they need to do. You are hearing the story about how this project is the pinnacle of Aditya's life's work as a mathematician, software

engineer & technologist, and entrepreneur.

The lessons he shares are amazing and the numbers and statistics that we discuss about the effect of mathematics on the entire future of a child's learning may be frightening, but the fact that Aditya is doing something to change that is something you will thoroughly enjoy out of a great conversation. Great lessons on being a founder, and doing good with technology which is something I think we all need to learn from.
